Winter News

This year is flying by for us in second grade. We are having an absolute blast, and enjoying every minute of our time together.

Social Studies and Science

In both Social Studies and Science we have been discussing natural resources. We have just started chapter 5 in Science, and we will be discussing more earth science including weathering and erosion. In Social Studies, we are learning about the connections between work and money.

Math

In Math, we are wrapping up on two-digit addition. The next topic we will cover in Math will be two-digit subtraction.

ELA

In ELA we are working on digraphs. We will be moving on to three letter blends after we master digraphs. Students are also working on different kinds of nouns and showing possession with apostrophes.

Religion

We are continuing to focus on the sacrament of penance and reconciliation. Students will experience this sacrament on January 19, 2019. We will also learn about advent during the advent season.
